

Collector\_if

```
graph BT; CollectorDummyImpl --> Collector_if
```

A UML class diagram showing a relationship between two classes. The class 'Collector\_if' is at the top, represented by a white rectangle with a black border. The class 'CollectorDummyImpl' is at the bottom, represented by a gray rectangle with a black border. A blue arrow points from the bottom of 'CollectorDummyImpl' to the bottom of 'Collector\_if', indicating that 'CollectorDummyImpl' implements or inherits from 'Collector\_if'.

CollectorDummyImpl
